1. Purpose & Scope

The iLEAD Codex exists to support the open, responsible development of immersive learning knowledge, practice, and infrastructure in service of human learning and development.

This document articulates the operating principles that govern how knowledge is:

- proposed,
- examined,
- revised,
- shared, and
- stewarded

across the Innovation Garden ecosystem.

These principles apply to all Codex materials, activities, and associated spaces, including—but not limited to—Books A through F.
