

8. Learning as a Civic Practice

iLEAD treats immersive learning not only as a technical or pedagogical endeavor, but as a civic practice with social, cultural, and ethical consequences.

As such, the Codex emphasizes:

- reflective practice,
- responsible innovation, and
- awareness of downstream impacts on learners, institutions, and communities.

The goal is not acceleration for its own sake, but capable, thoughtful progress. This discipline to create high-quality immersive learning requires diligence, humility, trust, and love.
